

STRONG PASSWORDS

Strong passwords help prevent unauthorized people from accessing files, programs, and other resources, and should be difficult to guess or crack.

A STRONG PASSWORD:

- Is at least eight (8) characters long
- Doesn't contain your user name, real name, or company name.
- Doesn't contain a complete word
- Different from previous passwords
- Contains upper and lowercase letters, numbers, and symbols.

MAKE YOUR STRONG PASSWORD EASY TO REMEMBER:

It is often easier to remember a sentence such as "Every fall since 1897, the Grizzlies and Bobcats have played in the Brawl of the Wild." Turn that into a password by using the first digits of each word, **Efs1987tGaBhpitBotW**

**DIGITAL
INVESTIGATIVE
GROUP**
